

Resellers/Partners

Does your business have an existing client base of small businesses that need a powerful web presence at a reasonable price? Are they struggling to update their websites, waiting for their webmasters to make changes and get current products and information on their websites?

Expand your business and give your clients a great value added service by reselling our services. It is completely white label. We blend right into your team. We can even use your company's e-mail address for seamless integration.

When your clients succeed, so do you. Make sure they can update their websites on their schedule. Waiting for their webmaster to update their site costs them money. They can be losing money because new products are not on their website in a timely manner. Build them a CMS website so they have control.

A CMS is a simple way for your clients to edit and control their website on the fly. They simply log in and make their updates, push save and it is live on the web. There is no need for them to know HTML or anything about servers.

We use existing open source software to keep costs down. We are experts at setup, hosting & maintenance on open source CMS sites.

We install the CMS & any add-on components that your clients choose, train them on its use, and are there to support them and answer any questions they may have. We will train them so they can easily make changes to the content, keeping it up-to-date. They do not need to have any experience with HTML, it is as simple as using a word processor. Making changes to their site is a breeze.

We also provide reliable hosting for their site at a reasonable price.
